

Lost Revenue Saved with Gas Log - MPG Fuel Tracker

Published on 11/06/09

Big Blue Clip today released Gas Log - MPG Fuel Tracker 1.5 for the iPhone and iPod Touch. Gas Log - MPG Fuel Tracker keeps track of gas and mileage for multiple vehicles, all in one convenient spot. You always have your mileage and expenses at hand, which you can view by trip or year, break downs per vehicle or as totals. Via an easy to use interface, individuals enter their data into their iPhone or iPod Touch, rather than stuffing receipts into pockets or something similar.

Waretown, NJ - Announcing that Alex Keim of Big Blue Clip today released Gas Log - MPG Fuel Tracker 1.5 for the iPhone and iPod Touch, which helps prevent the loss of refundable gas and mileage costs. The concept behind Gas Log - MPG Fuel Tracker is simple. Via an easy to use interface, individuals enter their data into their iPhone or iPod Touch, rather than stuffing receipts into pockets or something similar.

Keim was guilty of 'receipt stuffing' himself, "I used to keep track of my fuel usage on a piece of paper in my glove box. It was not very useful because I rarely remembered to enter it into a spread sheet." The frustration of trying to find all his bits of paper and then trying to sort them out, led him to write the program for a new app that would handle everything for him, including calculations for fuel consumption and distance.

Although Gas Log - MPG Fuel Tracker works for everyone, people who travel to conduct business suffer the most from unorganized gas and mileage records. When it comes time to turn in an expense report or when tax time rolls around, missing receipts means fewer dollars returned. Simply using this app will eliminate that headache.

Something Keim kept in mind as he was designing Gas Log - MPG Fuel Tracker, was that it needed to be fast, easy and able to accommodate information for more than one vehicle. Development of the product was made to include display reports that let users know how much fuel they've purchased at what price and how far they've traveled per mile, kilometer, trip or year. The app can be edited and is exportable as a spreadsheet to email.

About Gas Log - MPG Fuel Tracker

Anyone concerned about their travel expenses needs the Gas Log - MPG Fuel Tracker app for their iPhone or iPod Touch. It keeps track of gas and mileage for multiple vehicles, all in one convenient spot. You always have your mileage and expenses at hand, which you can view as trip or year break downs per vehicle or as totals.
