

BatchOutput for Microsoft PowerPoint Now Supports Apple M1 Processor

Published on 07/21/21

Zevrix Solutions announces BatchOutput PPT 2.2.21, a compatibility update to the company's output automation solution for Microsoft PowerPoint. In addition to batch printing, the software lets users carry out automated professional PDF production directly from PowerPoint. Users can reduce PDF file size, optimize images and encrypt PDF files. The new update adds native support for Apple's M1 processor, which enables users to run BatchOutput DOC on their Silicon Macs without hardware emulation.

Toronto (ON), Canada - Zevrix Solutions announces BatchOutput PPT 2.2.21, a compatibility update to its output automation solution for Microsoft PowerPoint on macOS. The software provides advanced solutions for demanding enterprise and office publishing environments through automation of printing and professional PDF output.

The new update adds native support for Apple's M1 processor, which enables users of a Mac with Silicon processor ("ARM Mac") to use BatchOutput PPT on their device without hardware emulation. And with the recent release of M1 compatible version of Microsoft Office, BatchOutput PPT users can take the full advantage of the performance and efficiency offered by the ?Apple Silicon? chip.

In addition to batch printing, the software lets users carry out powerful professional PDF production directly from PowerPoint eliminating the need for time consuming post-processing. BatchOutput PPT brings advanced PDF and printing options right to the user's fingertips:

- * Print and export to PDF multiple PowerPoint documents automatically
- * Split PowerPoint files into single page PDFs
- * Variable output file names
- * Encrypt and password-protect PDF from unauthorized copying, printing, and viewing
- * Reduce PDF file size and optimize documents for web, print or mobile devices
- * Change PDF color tone, brightness and other properties

BatchOutput PPT is a part of the Zevrix BatchOutput family which also includes output automation solutions for Microsoft Word, Excel, Adobe InDesign and PDF workflows.

Pricing and Availability:

BatchOutput PPT can be purchased for \$19.95 (USD) from the Zevrix website as well as from Mac App Store and authorized resellers. Trial is also available for download. BatchOutput PPT requires macOS 10.9 - 11.x and Microsoft PowerPoint 2011-2019 and later.
