

CallSaver iPhone App Enables UK Users To Save Money

Published on 11/15/09

Independent iPhone developer Jeremy Bassett today announces CallSaver 1.0 for iPhone and iPod touch. CallSaver aims to solve the problem of avoiding costly 0845 & 0870 UK telephone numbers. It allows users to directly browse an internal database to find alternative UK numbers. Users will be able to save money by accessing a database containing the most popular companies and authorities instantly.

Bristol, United Kingdom - CallSaver 1.0, the most complete solution yet to the problem of avoiding costly 0845 & 0870 UK telephone numbers, is now available. It is the first iPhone App that allows users to directly browse an internal database to find alternative UK numbers. Users are provided numbers with supporting information to ensure the call is placed correctly. Users will be able to save money by accessing a database containing the most popular companies and authorities instantly.

The user interface has no adverts and navigation to the required number is simple. CallSaver allows the user to feedback the call success, report obsolete numbers and submit their own suggestions and request numbers they require. The CallSaver database promises regular online updates from continued research and crowd sourcing the user base.

CallSaver features:

- * Category Browsing
- * Full Company Listing View
- * User Number Submission Facility
- * Call Feedback for Database Optimisation
- * International Support
- * Number Request Facility
- * Frequent updates from Cloud
- * Favourites Storage for easy retrieval
- * UK / International Number Formatting

Jeremy Bassett, the creator of CallSaver said on its release, "It has always infuriated me how my iPhone and landline bills always seem to have a charge line for so-called 'local calls' not covered by the inclusive deal. For nearly a year, I have been collecting the alternative numbers and building this iPhone App to help others avoid these high charges. It is just the start really, I hope to update the database regularly with user's suggestions and continue research to make this database the number one resource. I am already working on the free update to Version 1.1 and this will add number search and address book integration to make it even easier to find and store numbers."

Device Requirements:

iPhone and iPod touch 2.2.1 or later

Pricing and Availability:

C

App Store in the Utilities category.
