

Mac News Junkie Bundle Announced

Published on 09/25/07

C-Command Software and Cynical Peak Software announce the Mac News Junkie Bundle for EagleFiler and Cyndicate. The bundle is a limited time offer that runs from September 25th through October 1st for \$55.

IMMEDIATE RELEASE

Scottsdale, Arizona - September 25, 2007 - C-Command Software and Cynical Peak Software today announced a special bundle offer for Mac users, the Mac News Junkie Bundle. It combines Cynical Peak's RSS news reader Cyndicate and C-Command's EagleFiler information

manager. Cyndicate gives users a powerful tool for news by bringing them all of their syndicated content. Then, with the push of a button, users can add their favorite articles to EagleFiler for long term archiving and searching. Together, the two applications provide a robust news reading experience, helping users to select interesting articles to read, save them for reference, and locate them again when needed.

EagleFiler Overview

EagleFiler makes managing your information easy. It lets you archive and search mail, Web pages, PDF files, word processing documents, images, and more. Use it to collect information from a variety of sources. Browse different types of files using a standard three-pane interface. Organize them into folders and annotate them with tags and notes, or leave everything in one folder and pin-point the information you need using the live search. Since EagleFiler stores its library in Finder format, you can use it in concert with the other tools in your Mac ecosystem.

Cyndicate Overview

Cyndicate is a easy-to-use, next-generation, RSS/Atom syndication feed reader that gives you command over your news. Leveraging Mail's familiar interface and ease of use, Cyndicate presents syndicated content with an article centric paradigm. By treating the article as the base unit instead the feed itself, users have more flexibility performing actions around them with finer granularity. This article centric paradigm makes following blogs and web sites via RSS feeds as easy and efficient as reading email.

Pricing and Availability

This special offer is available starting immediately and ends October 1, 2007. The bundle may be purchased for \$55 USD and both applications come with fully-featured demos. EagleFiler normally retails for \$40 USD, Cyndicate normally retails for \$29.95 USD.
