

## **BKeeney Software presents new enrichments of Task Timer**

Published on 11/19/09

Kansas based BKeeney Software today announced Task Timer 4.2.5, an update to their time management software for Mac OS X and Windows. Task Timer is an easy-to-use project management tool that tracks time spent on an unlimited number of projects and tasks down to the minute. Version 4.2.5 is a maintenance release for improved performance and increased functionality. The dock and status menus are now hierarchical for Mac OS X users.

Lenexa, Kansas. - BKeeney Software, Inc. is releasing fixes to minor bugs and changes to the dock and status menus with its time management software. Task Timer version 4.2.5 is a maintenance release for improved performance and increased functionality. In version 4.2.5 of Task Timer, the dock and status menus are now hierarchical for Mac OS X users. In addition, Mac OS X users are now prompted to install Task Timer in the applications folder if the user tries to run Task Timer from another location. New for Windows users, start and stop timers can now be controlled via the system tray menu. A number of minor bugs are fixed as well.

Task Timer is an easy-to-use project management tool that allows users to track time spent on an unlimited number of projects and tasks. Users can start and stop time via a status menu that is available even when Task Timer is not the active application. Task Timer generates reports using a specified data range, and users can easily view weekly, monthly and yearly totals in unique chart settings. Task Timer conveniently synchronizes data on each user's computer with a database server, so it even tracks time when users are away from the office. It even allows multiple users to synchronize to a centralized database server.

### Pricing and Availability:

Task Timer is the perfect time-management tool and may be purchased online for \$24.95 (USD). A free 14-day trial is also available online. BKeeney Software products also include Slideshow Magic, a multimedia production and presentation tool; a file management program called File Sheriff; and Font Pilot, which allows users to manage fonts and preview new fonts without installation.
