

Sandlot Games' Cake Mania(R) Comes To The Mac

Published on 09/27/07

Popular Mac-only game publisher, Red Marble Games, in conjunction with Sandlot Games(R), a leading developer and publisher of casual and family-friendly games, have announced the release of Sandlot Games' Cake Mania(R) for the Macintosh. A wildly popular game on the PC and other gaming platforms, and winner of the prestigious iParenting Media Award, Cake Mania serves up countless delights that will have the whole family begging for more.

BOSTON, MA - September 27, 2007 - Popular Mac-only game publisher, Red Marble Games, in conjunction with Sandlot Games(R), a leading developer and publisher of casual and family-friendly games, have announced the release of Sandlot Games' Cake Mania(R) for the Macintosh. A wildly popular game on the PC and other gaming platforms, and winner of the prestigious iParenting Media Award, Cake Mania serves up countless delights that will have the whole family begging for more.

Jill, the heroine of Cake Mania, returns home from culinary school only to find that her family's bakery has gone out of business. In this fast-paced gaming favorite, players must help Jill rebuild the family bakery from scratch, baking custom cakes for a wide variety of customers in the process - some of which are hilarious - and earn enough money to reopen the bakery. Can you help Jill finish the cakes before her customers grow impatient and walk away? She's depending on your keen skills and culinary expertise to pull it all off.

"Sandlot Games' Cake Mania is a game that everyone in the family will absolutely love," said Mark Batten, founder and CEO of Red Marble Games. "All at once, Cake Mania is extremely funny, fast-playing, engaging, and an absolute thrill to play over and over again. Cake Mania is an award winning game for very good reason, and we're honored to have worked with Sandlot Games to bring Cake Mania to Mac users around the world."

Features of Cake Mania include:

- More than 45 levels of frenzied, fun baking excitement,
- Hilarious customers like Santa Claus, Cupid, and more,
- Get the customers to leave tips by serving up tasty cupcakes while they wait,
- Customize Jill's kitchen by purchasing state-of-the-art baking machines, and much more.

Priced at only \$19.95 (USD), Cake Mania is a Universal Mac OS X application that requires Mac OS X 10.3.9 or better, and is available for immediate download directly from Red Marble Games' website.

Founded in 2002 by Mark Batten, renowned game publisher Red Marble Games came about with

prMac: Publish Once, Broadcast the World :: <http://prmac.com>

the idea of bringing great independent games, originally developed for the Windows platform, over to the Mac. In one form or another, Mac games have always been a passion of Batten's, and by focusing on porting and publishing rather than on original development, Red Marble Games is able to make a broader array of high quality titles available for Mac people to enjoy. Red Marble Games is proud to be a Mac-only company, and focuses on bringing Mac users games that are easy to learn and fun to play over and over again. Most all of Red Marble Games' titles are intended to appeal to the whole family.
