

MF Software releases Top Rated Apps 1.0 for iPhone and iPod Touch

Published on 11/25/09

MF Software today is proud to introduce Top Rated Apps 1.0, a productivity title for the iPhone and iPod Touch. Top Rated Apps allows you to browse only the highest-rated apps on the iTunes App Store, and store favorites for future purchase or reference. Unlike the iTunes App Store, it also lets you browse apps offline, perfect if you have an iPod Touch or are on an airplane. The Top Rated Apps are organized by category, so you can browse them just like you would in the App Store.

Chandler, Arizona - MF Software today is proud to introduce Top Rated Apps 1.0, a productivity title for the iPhone and iPod Touch which allows you to browse only the highest-rated apps on the iTunes App Store (instead of having to sort through many low-rated apps), and store favorites for future purchase/reference. It also lets you browse apps offline, unlike the iTunes App Store - perfect if you have an iPod Touch or are on an airplane.

MF Software's editors have reviewed literally thousands of apps on the store, and included over 500 apps (including over 300 games) that iTunes App Store users have rated on average 4 star or higher. The Top Rated Apps are organized by category, so you can browse them just like you would in the App Store.

The great thing is, the large database of apps that have been assembled is stored *in the application itself* instead of being downloaded from the internet during use like in most other app store browsing apps (although it does update app info during browsing). So, users can browse icons, ratings, descriptions, etc. (everything except screenshots) offline.

Finding all these great apps wouldn't be any good if you couldn't build a list of your favorites for later. So, built in is an easy way to add apps you like to a Favorites tab, so that you can add apps NOW and then decide which ones to buy LATER. No more forgetting which apps you liked, and having to look for them all over again!

All this power for a low low price - and more updates and features are already planned! Keep up with the new features and updates in the works, as well as our other apps, on Twitter.

Device Requirements:

* iPhone or iPod Touch 3.0 or later

Pricing And Availability:

Top Rated Apps 1.0 for iPhone and iPod touch is available for the introductory price of \$1.99 (USD) and available exclusively through the App Store in the Productivity category.
