

Translatelt! 11.2 released - New version of Dictionary for Mac OS X

Published on 11/26/09

New York based Translatelt! Team today released Translatelt! 11.2, an update to their multilingual dictionary for Mac OS X. Translatelt! allows you to look up words on the fly. Just hover the pointer over an unfamiliar word and see its translation in a pop-up window. Translatelt! offers several methods: translation from clipboard, drag-and-drop translation, manual input of queries in the main window, and double-click translation of words in dictionary entries displayed in the main window.

New York, NY - Translatelt! Team today released Translatelt! 11.2, an update to their multilingual dictionary for Mac OS X. Translatelt! for Mac is a multilingual dictionary that allows you to look up words on the fly! Just hover the pointer over an unfamiliar word and you will see its translation in a pop-up window.
