

Scanner Pro 1.2 integrates with Print n Share - Uploads Scans to Dropbox

Published on 12/03/09

Readdle today announced Scanner Pro 1.2, the latest version of their popular iPhone application which transforms the device into portable scanner. Version 1.2 introduces integration with Print n Share from EuroSmartz, the all round iPhone printing application. This integration will enable owners of the both applications to seamlessly scan and then print documents. Another anticipated addition is the ability to upload scanned documents to Dropbox cloud storage.

Odessa, Ukraine - Today Readdle announced the release of Scanner Pro 1.2, the latest version of their popular iPhone application which transforms the device into portable scanner. Scanner Pro 1.2 introduces integration with Print n Share from EuroSmartz, the all round iPhone printing application. This integration will enable owners of the both applications to seamlessly scan and then print documents to any USB, WIFI, Bluetooth or network printer via a Mac or PC. Another highly anticipated addition of the new version is the ability to upload scanned documents to Dropbox cloud storage.

"Scanner Pro is designed to scan multipage documents and transform them into industry standard PDF files, while Print n Share enables people to print documents from their iPhones. Integration between those two applications was inevitable," says Igor Zhadanov, Readdle CEO. "Now you can really do everything you need with your scans: send them by email, upload to web and now print!"

Prior to this type of integration iPhone developers were trying to implement all functions their users might need individually, resulting in long development cycles and highly complex applications. Co-operation between Readdle and EuroSmartz is an example of the new trend in the App Store, where established iPhone developers combine their efforts to add more functionality to their applications.

"Print n Share has become the default printing application for the iPhone and we are very pleased to be working with Readdle on this integration to enable Scanner Pro customers to print documents they have scanned onto their iPhone" says Ian Schenkel, Eurosmartz CEO. "We feel this sort of integration and co-operation will ensure iPhone users are able to achieve everything they need for their business requirements now and in the future.

Support of the Dropbox cloud storage service is another very important enhancement implemented in Scanner Pro 1.2. Now, both free and paid Dropbox users can upload documents to their accounts directly from Scanner Pro. It makes Scanner Pro first third-party iPhone application that works with Dropbox.

Device Requirements:

Both applications are compatible with iPhones running iPhone OS 2.2.1 and later

Pricing and Availability:

Scanner Pro 1.2 is available on Apple App Store at \$6.99 USD to the new customers and as a free upgrade for existing users. Print n Share is available on Apple App Store at \$6.99.

About Eurosmartz

EuroSmartz was the first company to bring the functionality of printing photos, contacts, web pages and more to the iPhone when it released "Print" in late December 2008. Since that time EuroSmartz has become the number 1 provider of printing applications for the iPhone and iPod Touch. EuroSmartz was started by two brothers from New Zealand in 1994 and has excelled at developing software products across multiple platforms and operating systems.
