

## **Zevrix Updates BatchOutput - InDesign Automation Tool**

Published on 12/03/09

Zevrix Solutions today announces BatchOutput 3.5.6, a maintenance update to its popular professional solution to automate printing and exporting from Adobe InDesign. Developed originally for one of the largest Canadian ad agencies, BatchOutput offers output of multiple files, single page output, link auto-update, variable file names and other time-saving features. The new update addresses an issue related to timely dismissal of program alerts.

Toronto (ON), Canada - Zevrix Solutions today announces BatchOutput 3.5.6, a maintenance update to its popular professional solution to automate printing and exporting from Adobe InDesign. Developed originally in-house at one of the largest ad agencies in Canada to boost productivity of its prepress department, BatchOutput quickly became the software of choice for sophisticated automated output from InDesign. For example, BatchOutput can be left to output hundreds of InDesign files overnight, and the completed job can be picked up next morning.

BatchOutput offers the following powerful automation capabilities:

- \* Print and export hundreds of files with a single click.
- \* Output files as single pages.
- \* Update links automatically.
- \* Output files invisibly.
- \* Complex variable file names.
- \* Background processing.

BatchOutput is also available in a server version which offloads printing and exporting to PDF and PostScript to a central system leaving operator workstations free from the InDesign output process.

The new update addresses an issue in which the processing could stop if alerts weren't dismissed after a certain period of time.

### Pricing and Availability:

BatchOutput 3.5.6 can be purchased from the Zevrix Solutions web site, [www.zevrix.com](http://www.zevrix.com), for US\$119.95, as well as from authorized resellers. Trial is also available for download. Upgrade to BatchOutput 3.5.6 is free for licensed users of version 3.x, and US\$47.98 for the users of earlier versions. BatchOutput 3.5.6 is available for Mac OS X 10.4.2 and higher, a Universal Binary, and works with Adobe InDesign CS-CS4.
