

iJog 1.0 for iPhone - Simple and Accurate

Published on 12/10/09

AppAppers today released iJog 1.0 for iPhone users. The tracker app combines a clean, simple interface with accurate GPS technology that records time and distance, even if users are listening to music while they run or jog. iJog takes care of all trip calculations, even the course traveled, average speed, trip time and the number of calories burned. Users no longer need to manually calculate their pace or progress.

Waretown, NJ - Announcing that AppAppers, developers of iJog 1.0 for iPhone users, have released a tracker app that combines a clean, simple interface with accurate GPS technology. The new program records time, speed and distance, even if users are listening to music while they run or jog. There is no longer a need to manually calculate pace or progress.

Previously, it was necessary to use an online mapping service to track the distance of a route. Measuring distance and calculating speed and pace of a run or jog was time consuming and not always accurate. The iJog app takes care of all trip calculations, even the course traveled, average speed, trip time and the number of calories burned. Although anyone can use the app for measuring any kind of distance, runners and joggers will especially appreciate the health and fitness tips that are built right into the application, along with being able to view all their stats on one screen.

Features of iJog:

- * Clean, simple, easy to use interface
- * Calculates distance, speed, trip time, calories burned
- * Uses accurate GPS technology
- * Imperial or metric measurements
- * Choice of 10 changeable, beautiful backgrounds
- * View all stats on one screen
- * No calibration required
- * Can be used for any distance tracking - walking, driving, jogging, running
- * Helpful tips on health, fitness and safety
- * Users can listen to their iPod while using iJog

The simple yet accurate iJog app is touted as convenient, time-saving and fun.

About iJog:

iJog is a new tracking app for iPhone users. Its clean, simple interface combines with accurate GPS technology to provide a very user-friendly experience. Users can now let iJog do all of their speed and distance calculations, even when they're listening to their iPod app.

Device Requirements:

*

Pricing and Availability:

iJog 1.0 is only \$0.99 (USD) and available worldwide exclusively through the App Store in the Health and Fitness category. Promo codes are available for qualified reviewers. Please specify the website or blog you represent when making your request.
