Phone Wallpaper X is an innovated application used for creating, organizing and uploading wallpapers to mobile phones through Bluetooth or USB. Easy graphics editor allows to crop images in accordance with the defined exact position and size. Collect favorite wallpapers in Media Library and upload them to your mobile phone.

### **FOR IMMEDIATE RELEASE**

October 10, 2007 - A new company, Polo Planet Software, announced their premier Mac OS X application - Phone Wallpaper X. This is an innovated application used for creating, organizing and uploading wallpapers to mobile phones through Bluetooth or USB. Easy graphics editor allows to crop images in accordance with the defined exact position and size. You can also use Core Image filters for the chosen image area. Collect your favorite wallpapers in Media Library and upload them to your mobile phone.

Media Library contains user files with wallpapers. Original files, remade into wallpapers, can be saved for further editing or preparation of the wallpapers for other mobile phones. iPhoto-styled Media Library allows to choose optional elements for uploading, as well as displays the quantity and the size of the chosen files.

#### **Key features:**

- Cropping, resizing and editing of images
- Adaptable graphics editor
- Media Library for images organizing
- Easy uploading from the Media Library to mobile devices
- Export to graphic formats

#### **System requirements:**

- Mac OS X 10.4;
- At least 35MB of free disk space
