

Stone Design Ships Stone Works October 2007 featuring Create(R) 14.0

Published on 10/12/07

Stone Design, one of the original Mac OS X software houses, shipped Stone Works October 2007 with 17 applications, a screen saver and a widget. Featuring Create 14.0, the bundle has updated versions of Videator, TimeEqualsMoney, iMaginator, SliceAndDice, PStill, TrueBlue, PhotoToWeb, PackUpAndGo, GIFfun, PreferenceCommander, StarMores, XaoS, FontSight, GlobalWarmth, StampInStone, and introducing Qouija. All ready for Leopard, too!

Albuquerque - October 12, 2007 - Stone Design, the original Mac OS X Software house with over 19 years experience with the Mac OS X and precursor NeXTStep/OpenStep technologies, today announced immediate availability of its complete low cost and high performance productivity suite Stone Works. 17 applications, a widget and a screen saver that let you design and publish to print and web, bill for your services, make movies, photo albums, watermark documents, convert fonts, complete image processing, monitor the weather, choose fonts visually, manage your preferences, PDF management and much more!

According to Stone Design founder and CEO Andrew Stone, "You'll find the latest versions of Create(R), iMaginator, Videator and the rest of the universal (PPC and INTEL) Stone Works to be optimized for both Tiger and Leopard Mac OS X. This is the latest, greatest and most robust release yet - try our complete publishing and media creation alternatives - and with our Free Upgrades for Life, you'll be glad you chose the independent alternative! This is our 8th year of providing customers with free upgrades."

The complete Stone Works bundle, a professional publish to web and print solution, is available now for just \$399, That's a \$604 value, and comparable features from other software houses would be well over \$4000. Or you can buy any one of the included applications standalone. The Stone Works bundle can be downloaded now and contains 17 applications, a screen saver and a widget.

Create(R) 14.0, the design, pagelayout and web publishing powerhouse, features a new text engine and a new CSS-based XHTML web engine that's so Web 2.0. Read the complete Create(R) 14.0 Press Release.

SliceAndDice 4.2 which makes fancy navigation bars for Create(R), also features XHTML compliance.

Videator 4.2, the amazing realtime performance video machine and "PhotoShop for Video", adds a new Slide Editor, Quicktime 7.2 camera capture and is Leopard ready.

iMaginator 3.5, the first core image manipulation and effects application, now lets you set any custom size, loads faster and is Leopard ready.

PStill 5.6, the complete PDF processing, distilling, combining, separating, and investigating application, adds a new PDF Checker module, the ability to process all the EPS files in a tree of folders, and support for 16 bit images.

TimeEqualsMoney 3.3, the easy to use time and expense app which makes instant invoices, lets you round any time session up to the nearest 5, 10, 15 minute interval.

And, introducing Qouija 1.0 - a free application to divine the future through cosmic symbology

Also enhanced and updated for Leopard (features to be announced): PhotoToWeb 3.3, easy

prMac: Publish Once, Broadcast the World :: <http://prmac.com>

photo web publishing, copyrighting and thumbnailing; FontSight 3.1, visual font menus; PackUpAndGo 3.1, cross platform archiving; StampInStone 3.4, easy PDF watermarking; TrueBlue 3.3, TrueType and OpenType to PS Type 1 Font convertor; PreferenceCommander 2.2, manages sets of preferences for any app, StarMores 1.1, XaoS 3.2.8, the fractal generator that works with Videator, and GlobalWarmth 2.2, a multi-station weather monitor.

Stone Design Corp is located in beautiful Albuquerque, New Mexico, and was founded in 1984. Our mission is to develop low cost, easy to use, 100% Macintosh OS X native applications that are a joy to use. Stone Design develops a variety of productivity applications for Apple Inc.'s revolutionary operating system, Macintosh OS X. Early adopters of Mac OS X's precursor "NeXTStep" from Steve Job's company NeXT Inc. in March 1989, Stone Design's principals embraced the object technology of the NeXT Computer. Stone Design was the first independent software house to ship a shrinkwrap product for the NeXT Computer with "TextArt(TM)" in October, 1989. Stone Design currently has 17 applications, a screensaver and a widget which are known collectively as Stone Works.
