With rubiTrack for iPhone you can turn your iPhone 3GS and 3G into a fully fledged activity recorder and management device with rubiTrack. With rubiTrack you can record and manage all your outdoor activities like biking, running, walking and hiking. rubiTrack for iPhone comes with visual chart and track features that let you analyze workouts quickly.

St. Marein, Austria - toolsfactory software today announces the release of rubiTrack for iPhone 2.0, a GPS recorder and analysis tool for the iPhone 3GS and 3G. Using rubiTrack for iPhone you can turn your iPhone 3GS and 3G into a fully fledged activity recorder and management device with rubiTrack. With rubiTrack you can record and manage all your outdoor activities like biking, running, walking and hiking.

During activity recording rubiTrack for iPhone displays the track and heading and optionally shows maps, satellite images or hybrid maps. rubiTrack for iPhone allows you to take the workouts stored with rubiTrack for Mac with you on the go to analyse them wherever you want.

rubiTrack for iPhone comes with visual chart and track features that let you analyze workouts quickly yet thoroughly. You can select areas in the track and view instant statistics. The interactive chart is highly configurable to display all kinds of data including speed, pace, heart rate, elevation, cadence, power and many other values.

rubiTrack Recorder is a simplified version of rubiTrack for iPhone. It comes with all recorder features of rubiTrack for iPhone and saves an unlimited number of activities.

Main Features:

- * GPS Recorder with map backgrounds and UI locking
- * Unlimited activity history
- * Zoomable track view with instant statistics
- * Configurable activity charts to display speed, pace, elevation and more
- * Workout summary for weekly, monthly and yearly statistics
- * Uses GPS data as well as heart rate, cadence and power fitness data
- * 2-way sync with rubiTrack for Mac

New in this Version:

- * New recorder UI with optional live maps
- * Recorder locking for safely putting the iPhone in a pocket during recording
- * Configurable activity charts to display speed, pace, elevation and more
- * Detailed activity track with quick statistics feature and maps
- * Weekly, monthly and yearly workout summary chart
- * 2-way syncing to and from rubiTrack for Mac
- * Counts calories during recording
- * Many other improvements

Language Support:

rubiTrack for iPhone is fully localized in English, French, German, Italian and Spanish.

Minimum Requirements:

- * iPhone 3GS or 3G with iPhone OS 3.1
