

Unmarked Software updates Textsoap Deluxe to Version 5.7

Published on 10/16/07

unmarked Software is proud to announce the update of Textsoap Deluxe 5.7, their award winning text processing utility for Mac OS X. TextSoap moves beyond the boundaries of simple find and replace. With integration options like Services Menu support, Contextual Menu and Application plug-ins, with a single menu selection TextSoap Deluxe brings all this power to users right inside their favorite application. Version 5.7 sports an updated BBEdit plug-in, three new cleaners, and a new Coda plug-in.

IMMEDIATE RELEASE

Vancouver, Washington - October 16, 2007 - unmarked Software is delighted to announce the update of Textsoap Deluxe 5.7, their award winning text processing utility for Mac OS X. TextSoap moves beyond the boundaries of simple find and replace, and is a premier text transformation tool designed to make anyone more productive.

Version 5.7 sports an updated BBEdit plug-in with compact mode, allowing all the features of TextSoap in a minimum amount of space. Deluxe 5.7 offers three new and very useful Cleaners supporting the Markdown syntax. There is also a new Coda plug-in, providing complete functionality of TextSoap directly inside the Coda application.

Feature Highlights in Version 5.7:

- * Version 5.7 is now Leopard-ready.
- * Clean messy emails, websites and other text.
- * Maintain style information as text is transformed.
- * Transform text based on its style.
- * Style text based on its content.
- * Over 100 built-in cleaners available.
- * Quickly create custom cleaners to meet specific needs.
- * No programming skills required. Just Drag and Drop.
- * Share Cleaners between users.
- * Group Cleaners by task allows quick access to tools for the specific job at hand.
- * Keep articles at just the right length with on-the-fly word count.
- * Mac OS X Services and Contextual Menu support.
- * Application plug-ins for BBEdit, TextWrangler, Mailsmith, Eudora, and Coda.
- * Convert Markdown format text to HTML.

TextSoap Deluxe embraces Automator workflows to augment its own custom cleaners.

Workflow

support allows custom cleaners to be extended with AppleScript, Python, Perl, shell scripts, or virtually any other Automator action that processes text. A new custom cleaner action, combined with two special Automator actions, makes it as easy as drag and drop.

Supported Languages:

- * US English

System Requirements:

- * Requires Mac OS X v10.3.9 or later
- * Universal Binary: Works great on both Intel and PowerPC
- * 15 MB hard Drive space

Take total control of text and its style. Whether it is Mail, AppleWorks, BBEdit, Entourage, or TextEdit, TextSoap provides integration options such as Services Menu support, Contextual Menu and Application plug-ins. With a single menu selection TextSoap
