BaseElements 2.6 Released - FileMaker Pro Developer Tool

Published on 12/16/09

Goya announced today BaseElements 2.6, the latest update to the ultimate FileMaker Pro developer tool for analysing, documenting and completely cross-referencing every element in FileMaker Pro database systems. The integration of fmSearchResults adds a fast solution-wide search to BaseElements so that you can find any text used anywhere in your solution. Additionally, the new localisation functionality will extend its reach beyond the English speaking FileMaker world.

Mt Waverley, Australia - Goya announced today the release of the BaseElements 2.6, the latest update to the ultimate FileMaker Pro developer tool for analysing, documenting and completely cross-referencing every element in FileMaker Pro database systems. BaseElements is an essential tool for anyone who works in FileMaker Pro. Helping to find and fix errors, make decisions about the effects of changes to databases before they're made and document changes.

This new release of BaseElements cements it's lead as the preferred FileMaker Pro developer tool. The integration of fmSearchResults adds a fast solution-wide search to BaseElements so that you can find any text used anywhere in your solution. In addition, the new localisation functionality will extend its reach beyond the English speaking FileMaker world.

"I'm very excited to hear the new version now has multi-language capability, and looking forward to the Japanese version." - Shin Ninagawa, Splash Inc.

"BaseElements is a must-have tool for every serious FileMaker developer. Now with the addition of fmSearchResults, it's insanely easy and fast to find any metadata in your system" - Matt Navarre, MSN Media

BaseElements 2.6 adds:
* Fast, global search using fmSearchResults
* Localisation support
* Many updated reports
* Many more quick links from the Script view to individual items in the step
* More lookup option fields
* Support for FMGrowler for growl notifications inside FileMaker
* And more

Pricing and Availability:
BaseElements 2.6 is available immediately as a download from Goya online and is a free upgrade to BaseElements 2.x. Upgrades from BaseElements 1.x are $249 USD for a single user
and $649 USD for a Site License. A new single user license of BaseElements 2.6 is $499 USD and $1299 USD for a Site License. Not-for-profit and education pricing is available.
