

Notes Now Look Even Better with NoteMaster 3.0 for iPhone

Published on 12/22/09

California based Kabuki Vision today released NoteMaster 3.0, an update to their popular note-taking app for iPhone and iPod Touch. NoteMaster makes it easy to create great-looking notes by inserting images, photos, and headers right inside the text. Fonts and backgrounds can be selected for each note for a customized look. Version 3.0 adds the ability to customize notes with a choice of stunning backgrounds.

San Diego, California - Kabuki Vision has just released NoteMaster 3.0, which adds the ability to customize notes with a choice of stunning backgrounds. NoteMaster, already well-known for its ability to create great-looking notes that contain text, images, and headers, now makes notes look even better with a variety of themed backgrounds to choose from. NoteMaster makes it easy to create great-looking notes by inserting images, photos, and headers right inside the text. Fonts and backgrounds can be selected for each note for a customized look.

"The ability to insert images directly into your notes opens up a world of possibilities", says Adam Shaw, founder of Kabuki Vision. "And now with the ability to choose from a variety of backgrounds, your notes can be fully customized to fit your style or mood."

Other NoteMaster features include categories, password-protection, hyperlink detection, full-text search, e-mail, and syncing with Google Docs(TM). As the only notes app offering True Syncing with the Google Docs(TM) service, NoteMaster makes it easy to sync your notes to the cloud, allowing one to read and edit them on the web.

System Requirements:

- * Any iPhone or iPod Touch
- * OS 3.0 or greater

Pricing and Availability

NoteMaster is \$3.99 (USD) and is available exclusively through the App Store in the Productivity category. NoteMaster was recently featured by Apple as one of the "Staff Picks" of the US iTunes app store, and is currently one of the top-selling note apps in the store.
