

## **PDFKey Pro 3.5 released by Briksoftware**

Published on 10/22/07

Briksoftware is proud to announce the release of PDFKey Pro 3.5. This update focuses on enhancing the provided automation tools, presenting totally rewritten Automator actions. Users can now protect their documents through the new Lock PDF action directly in Automator. This upgrade is free for all PDFKey Pro 3.x registered users. In addition, to celebrate the great new features, Briksoftware's website has been redesigned to provide better and faster support.

Briksoftware is proud to announce the release of PDFKey Pro 3.5. This update focuses on enhancing the provided automation tools, presenting totally rewritten Automator actions. Users can now protect their documents through the new Lock PDF action directly in Automator. In addition, to celebrate the great new features, our website has been redesigned to provided better and faster support.

This upgrade is free for all PDFKey Pro 3.x registered users. Registered users of previous versions of PDFKey Pro can upgrade to the new version for \$5.99.

PDFKey Pro removes editing and printing passwords by creating exact copies of PDF documents, but without the passwords. PDFKey Pro also removes viewing passwords, but only if the passwords are provided beforehand.

PDFKey Pro can also lock PDF files by creating perfect copies, but protected with either, or both, a viewing password and a password to restrict usage permissions (printing and copying) to the files. Included with the PDFKey Pro distribution package are powerful batch-processing tools for the command line and Automator actions, to integrate PDFKey Pro in complex workflows.

PDFKey Pro is not designed to defeat DRM systems and will not decrypt eBooks or other protected materials.
