

DVDxDV announces Veescop Key Chroma Keying Plugin

Published on 10/22/07

DVDxDV is delighted to announce Veescop Key 1.0, a professional chroma keying plugin for Final Cut Studio and Motion. At its basic, Veescop Key is optimized to take advantage of the PowerPC G5 or Intel Core Duo processors graphics card for incredibly smooth, high speed previews of the final chroma key. Veescop Keys precise edge shaping allows users to optimize the key to carve away at the fine edges and uses advanced chroma keying techniques to create beautiful, professional quality video.

IMMEDIATE RELEASE

Los Gatos, California - October 19, 2007 - DVDxDV is delighted to announce Veescop Key 1.0, a professional chroma keying plugin for Final Cut Studio and Motion. At its basic, Veescop Key is optimized to take advantage of the PowerPC G5 or Intel Core Duo processors graphics card for incredibly smooth, high speed previews of the final chroma key. Veescop Keys precise edge shaping allows users to optimize the key to carve away at the fine edges and uses advanced chroma keying techniques to create beautiful, professional quality video.

Chroma keying is the technique of electronically cutting out the subject against a solid colored blue or green screen. Veescop Key shares the same keying engine found in Veescop Live, a real-time monitoring, chroma keying, and recording application for video production. Veescop Live can preview a chroma key shot on the set and Veescop Key can be used in post-production to create the final shot. Adjustments made on the set can now directly translate into saving thousands of dollars in post production time.

Supported Languages:

* US English

System Requirements:

- * Requires Mac OS X v10.4 or later
- * 192kb hard Drive space
- * Final Cut Pro 5.14 or higher
- * Motion 2.12 or higher
- * G5 or Intel Macintosh Recommended

Pricing and Availability:

Veescop Key 1.0 is available now directly from DVDxDV for only \$29.00 USD. The Demo Version of the software will produce a single horizontal stripe through the middle of the video when the filter is applied.
