

Quickie 1.0 released - Fast and Simple iPhone To-Do App for Ad-Hoc Lists

Published on 12/29/09

code.aplus today is proud to announce Quickie 1.0, a brand new to-do application for iPhone and iPod touch devices. Quickie is a breath of fresh air in the crowded field of Productivity applications. Featuring a beautiful interface and audio cues, Quickie offers simplicity and ease-of-use and is perfect to quickly type-in any kind of list, for just about anything that needs to be written down quickly, in 30 seconds or less.

Belgrade, Serbia - code.aplus today is proud to announce Quickie 1.0, a brand new to-do application available on the iPhone App Store. With its simplicity and ease of use, it's a breath of fresh air in the crowded field of Productivity applications and GTD monster do-all applications. Featuring beautiful interface and audio cues, Quickie is perfect to quickly type-in any kind of list, for just about anything that needs to be written down quickly, in 30 seconds or less:

- * Like shopping list
- * Or a travel packing checklist
- * Or take-away / coffee list for the entire office

Simple and fast. There is no faster list creation than what Quickie does - type list name followed by items, one by one on separate lines and click Save - ta-da, your list is ready to use.

Easy to use. Want to add more items? Simple, just add them one by one using in-place editing, never leaving the screen where list is displayed. There are no predefined items, no need for endless clicking around, dozens of screens to switch back and forth.

Device Requirements:

- * iPhone or iPod touch 3.1.2 or later

Pricing and Availability:

Quickie 1.0 is \$1.99 (USD) and available worldwide exclusively through the App Store in the Productivity category. Visit the Quickie web site to watch the video demo, read more information and look at more the screen shots.
