

Izatt introduces MatchTunes 1.0 for iPhone and iPod Touch

Published on 12/29/09

Izatt announced today the release of MatchTunes 1.0, its 41st app for iPhone and iPod Touch devices. MatchTunes is the game of matching song clips from the user's own iTunes library. Choose to match on music clip, song, album, or artist. Select the genre of music to play with or select all to draw from across all genres on the iPhone. Play a 2-player game to challenge others. Players can submit their best scores via OpenFeint to prove to the world they know their music.

American Fork, Utah - A brand new concept in memory/matching games has come to the iPhone.

Izatt has released MatchTunes for the iPhone and iPod Touch. Everyone has a different iTunes library, so everyone plays a different game!

Choose 4 different ways to play. Match on:

- * Music clip - same clip from the same song
- * Song - different clips from the same song
- * Album - clips from different songs on the same album
- * Artist - clips from different songs by the same artist (maybe same album, maybe not!)

Score points for each match. Get bonus points for multiple matches in a row! For two matches in a row, get an extra match bonus; for three matches in a row, get a double-match bonus, and so forth. Finish the screen before the timer runs out and get the remaining time as bonus points.

Change Settings to mix up the fun:

- * Choose a specific genre or choose ALL to draw from your entire iTunes library
- * Select the play length of the clip behind each tile; 1-60 seconds or the entire song

2-Player game lets users challenge their friends. Then friends turn it around and challenge on their iTunes. Players can submit their best scores via OpenFeint to prove to the world they know their music!

Device Requirements:

- * iPhone or iPod Touch 3.1 or later

Pricing and Availability:

MatchTunes 1.0 is only \$2.99 (USD) and available worldwide exclusively through the App Store in the Games category.
