

PhatWare Releases WritePad German Edition 3.0 for iPhone/iPod touch

Published on 01/12/10

California based PhatWare Corporation today releases WritePad German Edition 3.0 for iPhone and iPod touch. WritePad German Edition offers natural handwriting recognition input in the German language in addition to keyboard entry and integration with Bing Translation services. WritePad recognizes cursive, print, and mixed handwriting styles. To enter the text you can simply write with your finger on the iPhone screen in either landscape or portrait mode employing your own handwriting style.

Mountain View, CA - PhatWare Corporation, a leading provider of software products and professional services for mobile and desktop computers, announces today the immediate availability of WritePad German Edition 3.0. WritePad German Edition is the first iPhone product to offer natural handwriting recognition input in the German language in addition to keyboard entry and integration with Bing Translation services.

"Since WritePad was first released in October 2008 offering cursive handwriting recognition for the English language, we've received numerous requests to support other languages" - said Serena Perley, Director of Marketing of PhatWare Corp. - "Today we are proud to announce the availability of WritePad German Edition with French and Spanish versions to follow."

WritePad is a text editor that incorporates advanced handwriting recognition software for text entry. WritePad recognizes cursive, print, and mixed handwriting styles. To enter the text you can simply write with your finger on the iPhone screen in either landscape or portrait mode employing your own handwriting style. The built-in HTTP server allows users to exchange WritePad text documents between two or more iPhone devices and to download files onto the desktop PC using the Internet browser. Interface to the Bing Translator, lets users translate WritePad documents to 13 supported languages.
