

## Rune Trails by Quadion is Hot

Published on 01/12/10

Quadion Touch today announced that Rune Trails is featured as of yesterday in the What's Hot section of the App Store. Rune Trails is a challenging brain teaser that will just keep you coming back for more. Move the rune pieces around the board and create trails of five or more pieces to make them disappear. The game has had excellent reviews both from the press and gamers since its launch, achieving a ranking of 5 out of 5 and steadily climbing into the top positions of the App Store charts.

Buenos Aires, Aregentina - Quadion Touch today announced that Rune Trails is being featured as of yesterday in the "What's Hot" section of the App Store, and becoming increasingly popular by the minute. The game has had excellent reviews both from the press and gamers since it was launched fifteen days ago, achieving a ranking of 5 out of 5 and steadily climbing into the top positions of the App Store charts.

Rune Trails is following a path similar to NineGaps and WordWeaver, also developed by our team, which achieved excellent rankings, topped charts in the Games category for several weeks, and still lead charts in their own categories (Educational and Words) in several countries around the globe.

Rune Trails is a challenging brain teaser that will just keep you coming back for more. Move the rune pieces around the board and create trails of five or more pieces to make them disappear. Every time you make a move, new pieces are added to the board. You'll have to be clever and think of ways of removing the pieces faster than they appear. From time to time, special runes will help you clean a few more pieces. But don't count too much on them! If the board fills up, you lose! Rely on wits and strategy to stay alive!

### Feature Highlights:
